

SCHLAGE

VERTA™ SERIES

Design elevates the functional to the sublime. Clever design is unobtrusive, yet distinct. Beautiful design delights the senses, challenges us and inspires joy every day.

Inspiration is a source of innovation. Stemming from modern trends, Verta showcases the synchronicity between inspiration, innovation, design and style.

Architectural lines create surfaces that reflect light in every direction; tactile surfaces surprise and delight; lineal planes soften to curved edges – Verta's design features set a new standard for innovative style.

Our design story starts with a vision of a designer range of door and window furniture with a modern twist.

A locally based team of design specialists developed that vision further, influenced by classic designs, modern trends and architectural spaces.

Starting with a classic square shape, the designers added in subtle design features to define, elevate and modernise. A classic shape reinvented with modern design and precision engineering, Verta will enhance your home inside and out.

From the bevelled edges to soften hard lines, architectural lines to reflect light and gently curved handles for tactility, Verta is a modern reinvention of a classic; precisely engineered functionality with design at its core.

The entire Verta range is available in two stunning finishes: Satin Stainless Steel (SSS), and PVD Black, a Physical Vapour Deposition coating which creates a striking and durable black finish.

Beautifully designed products need attention to detail from creation to completion. Every element of Verta has been sourced, crafted and finished by experts.

Each piece of Verta is constructed from stainless steel. We start with one of the highest grades of stainless steel available – 316 marine-grade – sourced from an expert in the material.

No compromise is made during construction. Solid stainless steel is used throughout, moulded nylon load pads are seamlessly melded to vents, radius corners are micro-millimetre perfect and curved edges are polished with watch-maker precision.

After construction, Verta is tested. And tested. And tested again – to high endurance standards. A substantial 10 year mechanical warranty is offered across the range. Verta is an investment in quality and style for now and the future.

Verta's precision engineering, uncompromised design and superior construction is the perfect balance between functionality and beautiful design.

From the striking entrance pull handle, to the ingenious design and detailing of the vented window fasteners, Verta will add designer accents to every aspect of your home.

Traditional finish of Satin Stainless Steel (SSS)

Radius corners

Hard, straight lines soften into a radius corner, creating a juxtaposition between straight and curved

Stainless steel

Constructed from marine-grade stainless steel gives Verta strength, presence and lasting beauty

PVD Black is a striking new finish option

Lineal

Subtle, architectural lines create planes to reflect light in every direction

Tactile surface

Straight edges transition to gently rounded backs, curving into your hand and creating a soft touching point

Entrance

Mini Lever (Square)
